Family

About

The FIX FAMILY is the products line with first external screen in the world that is truly wind tight. Thanks to an ingenious fix system, the fabric is wind tight in every position and can be insect proof in the closed position. It is a simple principle by which the sun-protecting fabric has a special trim with a symmetrical zip which holds the entire structure firmly in the two side channels FIX FAMILY, the technological performer in terms of comfort and ease of use, can be used in residential, offices and project buildings. The extensive range of colours of the fabrics and the profiles ensures that the FIX FAMILY is in perfect harmony with the architecture of your home or company, which automatically leads to a pleasant living and working environment. All materials used for the FIX FAMILY are 100% corrosion-proof.

About Us.

With the inspiration and the courage to think a step ahead, MY SUN SHADES has created a new art form in the world of internal and external window treatments.

Understanding the perfect blend of beauty and elegance and combining this with unique material technologies, we have developed a range of window shadings that will fascinate you with their sophistication and superb functionality.

We simply call this the “art of progress” designed by people for people.

At MY SUN SHADES we specialise in customised window solutions where light and climate control are essential elements of the experience. Our products distinguish themselves by weaving contemporary design with the high reflection and transmission values of our specially designed and developed fabrics and materials.

WE ARE

a highly skilled company with many years of experience that puts great faith in mutual trust and relationships with our clients and partners. Partnership to us means not only listening, but understanding as well.

WE AIM

to develop new products, drive things forward and open up new possibilities. Innovation is what spurs us on.

WE HAVE

passionately focussed ourselves on our key strengths: internal and external sunshade systems and products.

WE HOPE

with our products to actively contribute to the reduction of buildings' energy consumption and thus to responsible interaction with nature and the resources on our planet.

WE LOVE

the synthesis of technology and design and want with our products and services to make a contribution to good architecture.

WE BELIEVE

that our motivated and highly trained employees represent the key foundation for our company's success and further development.

let's work together.
